Students are ***strongly advised*** to check with the program they plan to apply to for specific prerequisites.

Entrance exam requirements:

Applicants must take the Medical College Admission Test (MCAT), preferably in the spring before applying.

What factors are considered in the admission process for medical school students?

1. The completion of the prerequisites for the program.
2. An overall GPA (this includes all coursework that has been attempted except for health, PE, orientation, and learning support courses).
3. A science GPA (this includes all science courses such as chemistry, physics, and biology.)
4. Quality of the admissions essay.
5. Community service and work experience. Students should consider volunteering at a local hospital or clinic to gain practical experience in the health professions. Shadowing a physician is also strongly recommended.
6. MCAT Entrance exam scores
7. Letters of recommendation.

Students should visit the [Association of American Medical Colleges](http://www.aamc.org) site for valuable information on the process of applying to medical schools in the US.
